

Priyadharshini

Aspiring AWS Cloud Professional

CAREER OBJECTIVE

Motivated professional with corporate experience and a growing passion for AWS Cloud technologies. Looking to transition into a cloud-focused role where I can combine my operational expertise with technical learning to support organizational goals by being innovative, adaptable, result driven & proactive.

PROJECTS

AWS Cloud Hands-on Practice Project

Explored and practiced deploying multiple AWS services to understand real-time cloud workflows and scalability concepts.

- Practiced launching and configuring **EC2 instances** with security groups and key pairs for web hosting.
- Created and managed **S3 buckets** for static website hosting, versioning, and data backup.
- Configured **IAM users, roles, and policies** to implement secure access control.
- Connected **Amazon RDS (MySQL)** database with EC2 to understand data integration and backup management.
- Experimented with **Elastic Load Balancer, Auto Scaling Groups, Route 53, and CloudWatch** to study traffic distribution, fault tolerance, and monitoring.

Personal Website Project

Built a **responsive website** using **HTML, CSS**, and hosted it on **GitHub Pages** to showcase academic updates and cloud learning progress.

- Developed front-end design and deployment skills using **Git** for version control and consistent updates.
- Designed mobile-friendly layouts with optimized performance.

WORK EXPERIENCE

Tech Mahindra Pvt Ltd – Senior Associate (2023)

- Assisted in backend operations and client communications for Australian projects, managing up to four simultaneous live chats efficiently.
- Collaborated with cross-functional teams to ensure efficient workflow and meet service-level agreement (SLAs).
- Suggested process improvements and recognized for adaptability, consistency, and maintaining quality under tight deadlines.

Skyrams Pvt Ltd – Operational Team Lead (2021 – 2022)

- Supervised daily operations, guided a small team, and acted as the main point of contact between management and team members.
- Streamlined reporting and coordination to enhance workflow efficiency, while providing market research, forecasts, campaign analysis, & consumer insights.

Wipro Ltd – Junior Associate (2018 – 2019)

- Supported back-office operations using SAP and CDAX, routing invoices through SAP workflows for payment verification and reconciliation.
- Identified and resolved Purchase Order (PO) discrepancies and performed data validation, and assisted senior associates in reporting and process automation.
